Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Claim Rejections - 35 USC § 112

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 7 recites a permanent attachment of the biasing means to the flexible material. However, claim 1, from which claim 7 depends, recites that these two elements are attached in "removable relation". Claim 7 will be addressed as best understood.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,14,18,21 and 26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by McVicker.

See material 26 and constant force spring 32. The spring is held within a sheath formed of the flexible material and from which the spring may be removed. See affixing means 42,44.

Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kim.

Kim is similar to McVicker and comparable elements are similarly applied against the claims. Claims 1 and 7 are addressed as best understood in light of the rejection of claim 7 under 112(2). Since the layers of the cover are inherently adhesively bonded, such adhesive maintains the spring on the cover.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over McVicker in view of Crider et al.

Providing a continuous affixing means for a roll-up cover is well known as taught by Crider et al and it would have been obvious to modify McVicker to have such means so as to more effectively attach his device and/or to cover up only half the window.

Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over McVicker in view of Eckels.

Eckels is applied as Crider et al, above, but shows magnetic attachment means.

C nclusion

Applicant's remarks have been considered and objections and rejections have been removed in light thereof.
